

Course code of P.G. Program

Semester-1

Paper-1

Psychology of Learning

Course code-A090701T

Course Outcome:

1. At the end of course students are able to understand the concept and importance of conditioning or learning theory, differentiate between classical and instrumental conditioning.
2. Be able to understand use of reinforcement in learning process and avoidance, role of punishment in learning.
3. Be able to understand how to generalize and discriminate between learning process.
4. Understand verbal learning and learning strategies.

Paper-2

Psychometric Methods: Measurement

Course code-A090702T

Course Outcome:

1. Learnt the assumptions and application of measurement in psychological research.
2. Learnt to use to select an appropriate statistics test to answer a research question.

Paper-3

Psychological Research

Course code-A090703T

Course Outcome:

1. Students have learnt the conceptual framework and overall process of research and to plan a research problem and stating about variables.

Paper-4

Psychology of Social Processes

Course code-A090704T

Course Outcome:

1. Know the basic concepts and different theoretical approaches of social psychology.
2. Analysis the mechanisms of forming person perception and explain how human behavior is influenced by social factors.
3. Describe and assess the basic concept, explaining characteristics and psychological theories of attribution.
4. Elucidate the factors contributing to persuasive communication and analyze interpersonal attraction in the light of different theories.

Paper- 5

Practical

Course Code- A090705P

Course Outcome:

By conducting practical on quantitative research methods students have developed the scientific understanding of discipline. A foundation has been laid for developing experiment and correlation research design and conducting studies based on them.

Paper-6

Research Project

Course Code-A090706R

Course Outcome:

Student have learnt writing a scientific research proposal. Each student has to learn to identify a research problem, outline the objective and hypothesis, select the sampling method and sample, do the related review of literature, figure out the data collection tools under the supervision of the guide/proposal supervisor faculty of the department and submit the proposal at the end of the semester for evaluation, Students will learn writing the research proposal for conducting the study.

P.G.2 Semester

Paper 1

Cognitive process Memory

Course code- A090801T

Course outcome:

1. To help learner understand the importance of memory in everyday life and brain behaviour relationship.
2. To help learner understand the use of theoretical aspect of forgetting in everyday life.
3. To familiarise students with some of the model and theory in cognitive process memory.

Paper 2

Psychometric method testing

Course code- A090802T

Course outcome :

1. Student have learnt how to construct a test and make it standardized for its execution
2. Student have learnt test of special ability.

Paper 3

Research Design and Methodology

Course code- A090803T

Course outcome:

1. Learnt the conceptual framework of research designing, psychological research established the understanding to plan a research study in the field of psychology.

Paper 4

Psychology of Social Behaviour and Problem

Course code- A090804T

Course outcome:

1. How to practice and motivated for altruism and Pro social behaviour in society.
2. To describe and asses the basic concept of aggression in everyday life and how they cope and reduce their aggression.

3. Comprehend and outcome of how various current social problem deep rooted in our society.
4. Explain the relationship between social role and norms in the context of social system that can directly connected to our social behaviour.

Paper 5

Practical

Course codA090805P

Course outcome:

By conducting practical on quantitative research method

students have developed the scientific understanding of the discipline. A foundation have been laid for developing experiment and correlational research design and conducting study based on them.

Paper -6

Research Project

Course code- A090806R

Course outcome :

Student have learnt the techniques of data collection, learn report writing and could learn how to handle issues.

P.G. 3-Semester

Paper-1

Cognitive Process

Course code-A090901T

Course Outcome:

1. To help learners to understand the importance of these cognitive process in every day life and prepare competent psychologist who would excel in knowledge, orientation and practice of cognitive psychology with high ethical standards and social relevance.
2. To help learners to understand the developmental aspects of perceptual process.

Paper-2

Psych diagnostics

Course Code-A090902T

Course Outcome:

1. Understand the historical and philosophical roots of clinical psychology.
2. Developing specialized skills in mental status examination case analysis and case presentation pertaining to specific psychopathology.
3. Ability to relate and connect concept of professional ethics and values in clinical psychology and it's application.
4. Conducting psychometric assessment, Diagnosis and intervention using appropriate psychotherapies.

Paper-3 (A) Elective

Guidance Psychology

Course Code-A090903TA

Course Outcome:

1. Students are able to understand the concepts importance and function of guidance in different aspects of the life
2. To help students selection of appropriate choice of course and in accordance with their ability aptitude personality and interest.
3. Guidance course aim to give individuals a better understanding of the self it helps them recognise their ability and potential and turn them into useful skill that can contribute to the welfare of society.

Paper-3 (B) Elective Behaviour Modification- Course Code-A090903TB

Course Outcome:

1. Clarify how behaviour modification fits into the larger context of the field of psychology. 2 identify historical figures and events pertinent and to learning and behaviour modification

Define and describe the characteristics of behaviour.

2. -How the field of applied behaviour goes about changing behaviour and describe the ABC's of behaviour.
3. -Identify pertinent professional societies and tea reviewed journal in the area of applied behaviour and analysis(ABA).

Paper-4(A) Elective

Industrial Psychology

Course Code-A090904TA

Course Outcome:

1. Concepts of industrial Psychology and to gain the knowledge of personal selection and its techniques.
2. To know about the concept of job satisfaction and group moral at workplace.
3. Define and describe the characteristics of behaviour.
4. The meaning and framework of human engineering and learn also how to display and control equipments.

Paper- 4(B) Elective

Physiological Psychology

Course Code-A090904TB

Course Outcome:

1. Develop the ability to understand the application of physiological psychology.
2. To help learners understand the developmental aspects of nervous system.
3. To understand the concept of physiological mechanism of emotion and describe the various concepts of internal environment.

Paper- -5

Practical

Course Code- A090905P

Course Outcome:

By conducting practical on quantitative research methods students have developed the scientific understanding of discipline. A foundation has been laid for developing experiment and correlation research design and conducting studies based on them.

Paper-6

Research Project

Course Code-A090906R

Course Outcome:

Student have learnt method to analyse the qualitative/quantitative data set and various style of reporting the result APA guidelines for reporting and refrencing as well.

P.G. Semester-4

Paper-1

Cognitive Process: Thinking

CourseCode-A090001T Course Outcome:

1. To help learners to understand the importance of these cognitive process in everyday life and prepare competent psychologist who would excel in knowledge, orientation and practice of cognitive psychology with high ethical standard and social relevance.
2. Two familiarize students with some of the major approaches and perspective in cognitive psychology.
3. To help learner understand the development of steps of perceptual process.

Paper-2

Psychotherapeutic Techniques

Course Code-A090002T

Course Outcome:

1. Develop the concept, nature, goal and ethical issue of psychotherapy.
2. Apply advance professional ethics in clinical and therapeutic practice.
3. Analysing and implement the various psychotherapeutic intervention in clinical setting.
4. Learn how to practice of cognitive behaviour therapy and behaviour therapy.
5. Learn the application of drug therapy.

Paper-3 Elective (A)

Counselling Psychology

Course Code-A090003TA

Course Outcome:

1. -To know the basic concept scope and expectation of counselling.
2. Develop the understanding counselling area in the field of: educational, vocational ,family marital,l drug addiction and gerentological.
3. Explain the views of human nature proposed by different approaches of counselling and developed the ability to apply their assumptions.
4. -Distinguish the role of a counselor in different counselling techniques with the having basic understanding and knowledge required for counselling as a profession.

Paper-3 Elective (B)

Behaviour Modification

Course Code-A090003TB

Course Outcome:

1. Students are expected to get a better understanding of basic principle of behaviour modification primarily, classical conditioning and operant conditioning
2. Students also are expected to know various procedure to apply the behaviour modification principal in the real life setting to achi way better quality life of the population being served that also include him/ herself
3. Students will be also gaining the therapeutic techniques.

Paper-4 Elective (A)

Organizational Behaviour

Course Code-A090004TA

Course Outcome:

1. Understand the structure of an organization and organizational behaviour.
2. Learnt about management by objectives (MBO)
3. Lunch meaning and theories of work motivation and leadership at their workplace.
4. Become aware of the organizational change, development ,climate and culture of an organization.

Paper-4 Elective (B)

Health Psychology

Course Code-A090004TB

Course Outcome:

1. Acquire and understanding of components of the field health psychology.
2. Become more aware of cultural differences and similarities in healthcare attitude belief and practices.
3. Gain and appreciation for the importance of cultural context in health and disease.

4. Learn about evidence for the role of Central psychosocial construction such as stress, coping ,personality and social support in health risk and outcomes .

Paper- 5

Practical

Course Code-A090005P

Course Outcome:

By conducting practical on quantitative research method students have developed the scientific understanding of discipline. Foundation has been laid for developing experiment and correlation research design and conducting studied based on them.

Paper-6

Research Project

Course Code-A090006R

Course Outcome:

To conduct systematic research and critical examination of acceptable and pertinent and information sources.

1. o apply qualitative and/or quantitative evaluation techniques to original data in a suitable manner.
2. To comprehend and apply ethical principles when collecting and evaluating data and other resources.
3. To accurately and effectively express research, themes and contexts, both in writing and orally.
